

JRS
CIVIL WORKS LTD

COMPANY PROFILE

Building Infrastructure.
Delivering with **Precision.**

ABOUT JRS CIVIL WORKS LTD

JRS Civil Works Ltd is a Ugandan civil engineering and construction company established to deliver reliable infrastructure solutions for public and private sector clients. The company focuses on practical project delivery across civil works, construction materials, site development and engineering support services. JRS approaches each assignment with attention to planning, workmanship, safety, cost control and timely execution.

VISION

To become a trusted civil works and infrastructure company known for dependable project delivery, sound workmanship and lasting infrastructure.

MISSION

To deliver practical, safe and durable civil engineering and construction solutions that meet client requirements, respond to local conditions and provide long-term value.

CORE AREAS

Civil Engineering & Construction

Roads, buildings, drainage, water infrastructure and structural works.

Materials Supply & Transport

Aggregates, hardcore, gravel, sand and project logistics support.

Engineering Support Services

Site development, equipment-supported works, steel fabrication and maintenance services.

SERVICE PORTFOLIO

We deliver end-to-end civil works solutions with **precision, quality and reliability.**

Road Works & Transport Infrastructure

Site clearing, earthworks, grading, gravel works, compaction, drainage construction and road maintenance.

Earthworks & Site Development

Excavation, land clearing, cut and fill, trenching, backfilling, levelling and foundation preparation.

Building & Structural Works

Commercial, residential, institutional and industrial structures, concrete works and renovations.

Drainage & Water Infrastructure

Storm-water drains, culverts, channels, water-retaining structures and pipeline-related civil works.

Construction Materials

Aggregates, hardcore, crushed stone, gravel, sand and selected fill materials.

Plant, Equipment & Fabrication

Equipment-supported works, haulage, crushing, structural steel fabrication and welding.

CIVIL WORKS DELIVERY

JRS Civil Works Ltd manages projects through a practical delivery model that connects planning, implementation and accountable completion.

01

Planning & Preparation

We review drawings, quantities, site conditions, access, materials and equipment requirements before mobilisation.

02

Execution & Supervision

We manage labour, plant, materials and daily site activities with close supervision, quality control and progress tracking.

03

Quality, Safety & Handover

We complete works to specification, maintain safe sites, address defects and hand over finished works in line with client expectations.

SECTORS WE SERVE

We deliver civil works solutions across a wide range of sectors, helping build stronger communities and sustainable infrastructure.
